Casablanca | +212 696 191 850 | yait.kad@gmail.com | linkedin.com/in/yassin-ait-kaddour-77b096193

PERSONAL SUMMARY

Software Engineer with a strong frontend background, specializing in React, Next.js, Astro, TypeScript, and Node.js. Passionate about building scalable, performant, and user-focused applications. I enjoy solving complex engineering challenges, designing maintainable architectures, and exploring how AI is shaping modern software engineering.

SKILLS

React.js • React Native • Next.js • Astro.js • NestJS • Node.js • TypeScript • Redux • React Query • React Hook Form • Vite • Tailwind CSS • Socket.IO • Sanity (CMS) • SEO

WORK EXPERIENCE

Senior Frontend Engineer

Marjane Mall, Casablanca | Aug 2026 - Present

Contributing to the development and evolution of one of Morocco's leading e-commerce platforms by building scalable, high-performance web applications.

- Building and maintaining scalable, high-performance features for a large-scale e-commerce platform serving a nationwide customer base.
- Working closely with engineering, product, and design teams to deliver maintainable solutions and improve the overall user experience.
- Driving technical excellence across frontend initiatives through code reviews, performance optimization, and reusable component architecture.

Technologies: React, React Query, Vite, TypeScript, Tailwind CSS, REST APIs.

Frontend Engineer

Agenz, Casablanca | Nov 2022 - Jul 2026

Agenz is Morocco's leading proptech platform, digitizing the real estate market through innovative marketplace and AI-driven solutions.

Marketplace

- Developed and maintained key features of the Agenz marketplace, focusing on property search, filtering, and agent-client interactions.
- Led the migration of landing pages from Next.js to Astro.js to improve SEO performance and reduce JavaScript payload for faster load times.
- Integrated Sanity CMS to build and manage blog pages, significantly boosting the platform's organic search visibility.

ProSpace (Back Office)

- Built a comprehensive back-office platform for real estate professionals, enabling agents to manage property listings, track inventory, and streamline client operations.
- Integrated RESTful APIs to retrieve and display real-time property listings and agent profiles.

Multi-Channel Communication

- Customized and maintained Chatwoot (open-source), extending it into a unified communication hub aggregating client messages from WhatsApp, Facebook, and web chat.
- Contributed to the AI chatbot interface, allowing users to interact with the platform's AI agent directly on the website.
- Implemented an SSO login flow to ensure secure and unified access for team members across chat tools.

Backend — PDF Generation Service

- Developed a Node.js endpoint using Puppeteer to automate the generation of official Agenz property documents and contact reports for agents.

Technologies: Astro.js, Next.js, NestJS, Node.js, Puppeteer, Socket.IO, Redux, Sanity (CMS), Tailwind, TypeScript, REST APIs.

Software Developer

1337 Labs (startups), Khouribga | Nov 2021 - Nov 2022

A strategic partnership developing an innovative real estate crowdfunding platform connecting investors with profitable farmland investment opportunities across Morocco.

- Built responsive, data-rich property listing pages with detailed financial analytics including projected ROI, rental yields, and funding progress indicators.
- Developed a real-time funding tracker showing live investment progress, number of investors, and remaining availability for each property.
- Implemented secure user authentication, KYC onboarding flows, and document upload/verification features ensuring regulatory compliance.
- Built a personalized investor dashboard displaying active investments, total portfolio value, expected returns, and transaction history.
- Implemented dividend and rental income tracking, allowing investors to monitor earnings distributions over time.

Technologies: Next.js, Redux, Tailwind, TypeScript, REST APIs.

Frontend Developer

Noun Web Services (SARL), Remote | Dec 2020 - Oct 2021

IT services and consulting company combining smart thinking, data analysis, and technology to accelerate digital transformation for enterprise clients.

- Developed and maintained a responsive administrative dashboard with React.js for furniture inventory management and product lifecycle tracking.
- Implemented a secure admin authentication system with 2FA and protected routes ensuring authorized access to the dashboard.
- Built responsive table components with sorting, pagination, and export capabilities for large product datasets.
- Built comprehensive product catalog management featuring real-time inventory status tracking for available and non-available items.
- Developed an advanced product tracking workflow managing order status transitions from pending through delivery stages.
- Integrated REST APIs for seamless data synchronization between the frontend dashboard and backend inventory systems.

Technologies: React.js, React Hook Form, React Query, CSS, TypeScript, REST APIs.

EDUCATION

Professional License, Web and Mobile Software Engineering

National School of Applied Sciences, Khouribga | Oct 2024 - Jun 2025

Computer Software Engineering

1337 Future Is Loading - 42 Network, Khouribga | Oct 2019 - Jun 2024

DTS, IT Development

Specialized Institute of Management and Computer Science, Marrakech | Oct 2017 - Jun 2019

Baccalaureate, Physics

School El Farahidi, Amizmiz | Jun 2016
